

Canada - Emigration & immi- December 4, 1880
gration

R. B. Angus to Molyneux St. John, Liverpool
Future of this Company and its friends in re-
gard to emigration very largely depends on the
action of the Canadian parliament respecting
the Pacific Railway project in which we are all
interested. If the contract is approved without
material alteration, it is my intention to visit
England immediately after for the purpose of
making financial arrangements in the first place
and next to discuss with my colleagues and you
the all important question of inducing a large
and constant flow of emigrants to the new
country.
