

Canadian Pacific Road

April 9, 1884

Hill to Sir John Rose, London

Explains decrease in earnings of Manitoba Road  
Caused by building the C.P., especially its  
Thunder Bay branch. The great increase in  
earnings in 1883 was due largely to the "Win-  
nipeg Boom" and the transportation of material  
for over 500 miles of the C.P. Road. The col-  
lapse of the boom and the completion of the CF  
to the Rocky Mts. and the opening of the Thun-  
der Bay branch has reduced the earnings of the  
Manitoba Road from that direction to a great  
extent.
