

Cattle - Distribution by Hill 1913, 1914
1915

In the papers of North Oaks Farm are many records of Hill's securing cattle and distributing them along the line of his railroad, especially in 1913 and 1914. These records include pedigrees, certificates of registry, contracts with the men to whom distributed the bulls and cows. Some of the imported animals had to be killed on arrival because they proved to be tubercular.
