

Coal as fuel

July 21, 1883

Hill to H.P. Breed, Gen. Supt.

Keep coal burners as few as possible, "the difference between cost of coal and wood per Engine is not less than \$1000 per year, ~~with~~^{to} which you may add further for boiler repairs - coal over wood -- and again you have the wood lying along the line while you have to buy the coal."

StPM&MRy LetterBook, 7:212 (4/23/83-2/13/85)
