

Missouri - Railroads

November 6, 1901

Hill to Geo. B. Harris      carbon

Re the lines in Missouri. "I think it would be very unfortunate to let the South Western property get away now. There will never be a better opportunity to secure it than at present, but early action ... is quite essential. Mr. Yoakum has been after it for a week past, and I asked the parties not to take up new negotiations until ours were ended. It would be unfortunate if his line should get into Quincy."
