Location: 116.A.4.2

HISTORY OF PROJECT 2030

Project 2030 is a special project of the State of Minnesota coordinated by the Aging Initiative of the Minnesota Department of Human Services and carried out in partnership with the Minnesota Board of Aging. Its purpose is to identify the impacts of the aging of Minnesota's population and help prepare the State's response to the baby boom generation that begins turning 85 in 2030.

SCOPE AND CONTENTS OF THE PUBLICATIONS

Publications produced mainly in the initial two-year planning process (1997-1998) of Project 2030, during which staff analyzed the facts and figures associated with the state's changing demographics and presented them to over 3000 Minnesotans through a broad range of public and private groups and organizations around the state in an attempt to assess what the impact of the aging baby boomers will be on the social, health, and financial structures of the state. Included are the final report on the planning process, a briefing book, symposium and roundtable data, and research and data reports. There are also three issues papers written in 1999.

INDEX TERMS

These records are indexed under the following headings in the catalog of the Minnesota Historical Society. Researchers desiring materials about related topics, persons or places should search the catalog using these headings.
Topics:
Age distribution (Demography)--Minnesota.
Aged--Economic conditions--Minnesota.
Aged--Services for--Minnesota.
Baby boom generation--Minnesota.
Demographic surveys--Minnesota.
Retirement--Minnesota--Planning.

Organizations:
Minnesota Board on Aging.

Location            Folder
Himle Horner Inc. conducted a telephone survey, focus groups
around the state, and an audit of professionals to determine the
attitudes and preferences of baby boomers towards retirement and
retirement planning. An attached document compares these
results to similar research conducted with 1998 Minnesota State
Fairgoers in.

Citizens League’s “New Wrinkle on Aging” Symposium Notes, June
1998.
Summary of the break-out discussion sessions that occurred at the
Attendees were given the opportunity to share their thoughts with
the panelists on how to deal systematically with an aging Baby
Boom generation.

Location            Folder
116.A.4.2  3 Project 2030 Data Report, Population Profiles: African American Elders,
American Indian Elders, Asian American Elders, Hispanic Elders,
October 1998.
The population of ethnic minority groups in Minnesota is
projected into 2030 at the state and county level. Illustrative
charts and maps depicting the size and geographic location of
these groups are included.

Project 2030 Data Report, Population Profiles: County and Regional
Data, October 1998.
The population of older Minnesotans is projected into 2025 at the
state and county level. Different age segments of the older
population are compared as if the number of older individuals to
younger age groups. Charts and maps depicting the size and
geographic location of the older population are included.

Summary of Roundtable on “Preparing Employees for 2030,” November
1998.
Summarizes the discussions among 28 individuals from
businesses and public employment. Issues discussed include the
role of employers in helping employees plan for their retirement
and the changing definition of retirement and retirement planning.
The Roundtable was co-sponsored by the University of
Minnesota Extension.

Location            Folder
State Department Liaisons, December 1998.
Descriptive summary of the reports produced by each of the state
departments regarding the implications of an aging population for
their “business.” Then current actions taken by the departments, as well as future recommended actions, are included.

Advisory report to the Department of Human Services, prepared by the Citizens League’s “New Wrinkle on Aging” citizen task force. The report takes a deliberative look at the issues, consequences and choices facing the State of Minnesota and its residents regarding the aging of the population.

Summarizes the many activities undertaken by the Minnesota Board on Aging as a partner in Project 2030. An analysis of the issues surrounding the aging of the population and the implications for the state are included. Actions recommended in the 2030 Community Forums to begin planning ahead for the implications of these shifting demographics are outlined.

Project 2030 Final Report Summary, [1998?].
Brief summary of the final report of the two-year planning phase of Project 2030 that includes purpose of the project, key demographic information, and visions, policy directions and suggestions for each of the four major themes. A summary assessment of the readiness of state government is also included.

Final report of the two-year planning phase of Project 2030. The issues surrounding the aging Baby Boom population are discussed, based on research and information generated through the workgroup, research, and outreach efforts of Project 2030. Outcomes resulting from these efforts are outlined. Recommendations for future actions to ready the state for the implications of the aging of the population are presented.
