Environmental Health Division:
An Inventory of Its Environmental Quality Review Files

OVERVIEW OF THE RECORDS

- Agency:** Minnesota. Division of Environmental Health.
- Title:** Environmental quality review files.
- Dates:** 1959-1986.
- Abstract:** Files on proposed construction projects, land usage, and other activities that were reviewed by the Health Department staff and the Environmental Quality Board for adverse environmental impact under Minnesota Statutes 116D.04.
- Quantity:** 53.7 cu. ft. (55 boxes).
- Location:** See Detailed Description section for box locations.

SCOPE AND CONTENTS OF THE RECORDS

The files include draft and final environmental impact statements and/or environmental assessment worksheets, and related applications, certifications of need, correspondence, reports, hearing transcripts, work plans, findings of fact, studies, and related materials.

There are numerous files on electric power plant siting and construction, particularly Northern States Power Company's SHERCO plant and Minnesota Power and Light Company's Clay-Boswell steam electric station and Floodwood/Fine Lakes/Brookston sites (St. Louis County); construction of high voltage electric transmission lines and terminals, especially in west central Minnesota by Cooperative Power Association and United Power Association; construction or upgrading of interstate and trunk highways and other roads; residential and planned community developments; and environmental quality review at the Prairie Island and Monticello nuclear generating plants, Allen S. King generating plant, and Elk River reactor.

Also well represented in the files are navigation and flood control projects; iron ore and taconite mining and transshipment facilities; copper-nickel mining; oil pipelines and storage; campgrounds and recreational facilities; wildlife, forest, and general environmental management projects and reserves; mosquito control; storage and disposal of hazardous materials; sewage treatment; sanitary landfills; and a variety of commercial and industrial plants and operations.

ARRANGEMENT OF THE RECORDS

These records are organized primarily chronologically by year; thereunder alphabetically by project name. However, many files include items from earlier years that were carried forward or used for reference.

RELATED MATERIALS

Several series among the records of the Minnesota Pollution Control Agency and the Minnesota Environmental Quality Board contain similar and sometimes interconnected materials.

INDEX TERMS

These records are indexed under the following headings in the catalog of the Minnesota Historical Society. Researchers desiring materials about related topics, persons or places should search the catalog using these headings.
