SPECIAL STATEMENT TO THE PEOPLE OF WATERBURY

Our society relies on individual initiative and involvement to make things work... This means we expect every individual to do his best. We expect every man who is able ~~xxx~~ to be willing to work.

But if the jobs aren't available, if the man has no skills, no education, no training, all the determination in the world isn't going to do much good.

~~Mr. Nixon says that he wants to take people off the welfare rolls and put them on the work rolls, but the Republican record simply doesn't bear him out. During the Republican years this country had its three major recessions---when overtime stopped coming in, when jobs were scarce, when plants and shops closed down. During the Republican years not a single new job training program was established.~~

That's the way things were in Connecticut during the Nixon-Republican years.

Mr. Nixon ~~says~~ says that he wants to take people off the welfare rolls and put them on the work rolls, but the Republican record simply doesn't bear him out. ~~During the Republican years this country had its three major recessions---when overtime stopped coming in, when jobs were scarce, when plants and shops closed down. During the Republican years not a single new job training program was established.~~

In the last eight years, things have changed, and the changes have made a difference for you, here in Connecticut. Jobs in Waterbury have increased by 14%. ~~Unemployment, which was at a high of nine percent back in 1960, has been cut in half. Vocational education enrollment has gone up almost 200%. Wages are higher and living standards have increased for all citizens.~~

But Mr. Nixon's top financial advisors have said that more, not less, unemployment may be necessary ~~according to~~ their plans for a Nixon fiscal policy.

I don't think we can afford that kind of economics. ~~I think that~~ This administration has proved that we can have full employment and stable growth. I don't think the cure for inflation is to put people out of work. I don't think this country has to be at war for you to have jobs.

There are ~~some~~ things we can do to hold and increase the Democratic ~~progress~~ progress toward full, meaningful employment.

---We must expand and improve our present programs of vocational education and work training. Worker mobility--so that there is not an oversupply of workers in any one field---is essential to full employment.

---We must find ways to ~~make~~ provide better opportunities where people live, to slow the present rate of migration from rural areas to the inner cities. I would support increased training programs in rural areas and work for a uniform standard of welfare and work benefit payments, ~~so that~~ <sup>urban areas</sup> such as yours would no longer have to pay the price of another state's reluctance to help its citizens.

---We must involve the private sector more closely in employment and training programs. ~~xxxxxx~~ <sup>This year an</sup> ~~xxxxxx~~ The present alliance of government and business ~~xxxxxx~~ which has brought about the employment and training ~~of~~ thousands under the JOBS program, <sup>it</sup> must be expanded into every urban area in the country.

xxxxxx

SPECIAL STATEMENT TO THE PEOPLE OF BRIDGEPORT

The first obligation of government is to provide for the safety of its citizens.

~~Every American has the right to a safe and a decent neighborhood. Ours must be a society in which order and justice prevail. On this there can be no compromise.~~

You want to know that your children are safe at play, that your streets are ~~safe~~ not places of fear, that your businesses and homes are secure.

I have been mayor of a big city. <sup>here,</sup> We fought for--and won-- the right of ~~the~~ citizens to live in safety. In the past four years I have visited hundreds of cities. I know what you want.

In Bridgeport--and in the nation--you want to know that your children are safe at play, that your streets are not places of fear, that your businesses and homes are secure, ~~that your neighborhoods are~~

Bridgeport is working hard for that goal.

Your city has assumed the financial burden of higher police salaries and increased police recruitment. A <sup>new</sup> lighting system for streets and parks will insure greater citizen safety. A special summer employment program <sup>gave</sup> ~~help~~ over 2,000 Bridgeport young people a profitable, productive rather than destructive summer.

But you know, and I know, that the programs we need represent a heavy drain on municipal resources. Many cities simply ~~can~~ can not afford adequate police protection. ~~The answer lies in federal assistance to help local police for local law enforcement.~~

I have made a series of proposals which will provide order and justice for ~~the~~ the American people:

---First, increased and expanded programs of assistance for local law enforcement agencies to help them do the job we have given them, to increase salaries, improve recruitment and training and to provide modern equipment.

---Second, a major new program of tax-sharing so that local governments may ~~benefit~~ benefit from rising federal revenues, using the new funds to fill local priorities of law enforcement, renewal, job training and education.

---~~Ex~~ Third, federally sponsored programs for law enforcement training and research at universities and ~~colleges~~ colleges throughout the country, with grants and fellowships for in-service police education.

---Fourth, a National Courts Assistance Act to ~~enable~~ our courts to ~~function~~

~~xxxxxxxxxxxxxxxx~~ end overcrowding of court dockets and the lack of personnel and resources in the judicial branch of government.

*but me*  
These proposals can ~~xxx~~ make a difference here in Bridgeport.

*But not?*  
But we can never forget that ~~prevention~~ crime prevention is the key to an ordered society, and ~~to prevent crime~~ We must make a new commitment to full employment, to complete educational opportunity for all citizens, to support for the young, the old, the handicapped. ~~With~~ *to America* and the frustration and despair of poverty, the conditions which breed crime + violence.

Without this commitment, order in America will be only the thinnest illusion. With it, order can be the context within which every citizen can live a life of responsibility and opportunity.
